Introduction

This instruction manual has been developed as part of the Enterprise Pro project for the Marshfield School History website. The aim of the system is to provide a structured and accessible way for storing, managing, and viewing historical information related to different schools and their records.

The website consists of multiple pages that present historical content, including text, images, and linked documents, as well as interactive features such as searchable databases. These databases allow users to efficiently find information about staff members and historical sources without needing to manually search through large amounts of data.

The system was designed based on the client's requirement to reduce duplication of research and make historical materials more accessible to other users. In addition, the website has been structured in a way that allows it to be reused and adapted for future projects.

This instruction manual provides guidance on how to use the system and how to make changes to different parts of the website. Each section of the manual explains specific pages and features in a clear and simple way so that users with limited technical knowledge can understand and follow the instructions.

Purpose of the Manual

The purpose of this manual is to explain how to use the Marshfield School History website and how to make simple changes to its pages, links, and database features. It is written to support users with limited technical knowledge.

System Overview

The Marshfield School History website is a web-based application that allows users to explore historical information about different schools. The system includes multiple pages containing text, images, and hyperlinks to historical documents.

In addition, the system includes two searchable databases: the Staff database and the Sources database. These allow users to search for specific information and access relevant records efficiently.

System Requirements

To use this system, the following are required:

- A device such as a laptop or computer
- An internet connection
- A web browser (e.g. Google Chrome, Microsoft Edge)

Accessing the System

1. Open a web browser
2. Enter the website URL Marshfield School History
3. The homepage will load automatically
4. Use the navigation menu to access different pages

About page: Marshfield school

Using the Homepage (Page 1):

The homepage introduces the Marshfield School History project and allows users to navigate to different sections of the website.

Steps to use the home page:

1. Open the website in a web browser using Marshfield School History
2. The homepage will be loaded automatically.
3. Use the navigation bar at the top of the page to move to other sections of the website.
4. Read the About section on the left-hand side for information about the project.
5. Read the Notable Dates section on the right-hand side for key historical dates.
6. Click the “here” link in the About section to open Page 1a and view the two booklets.

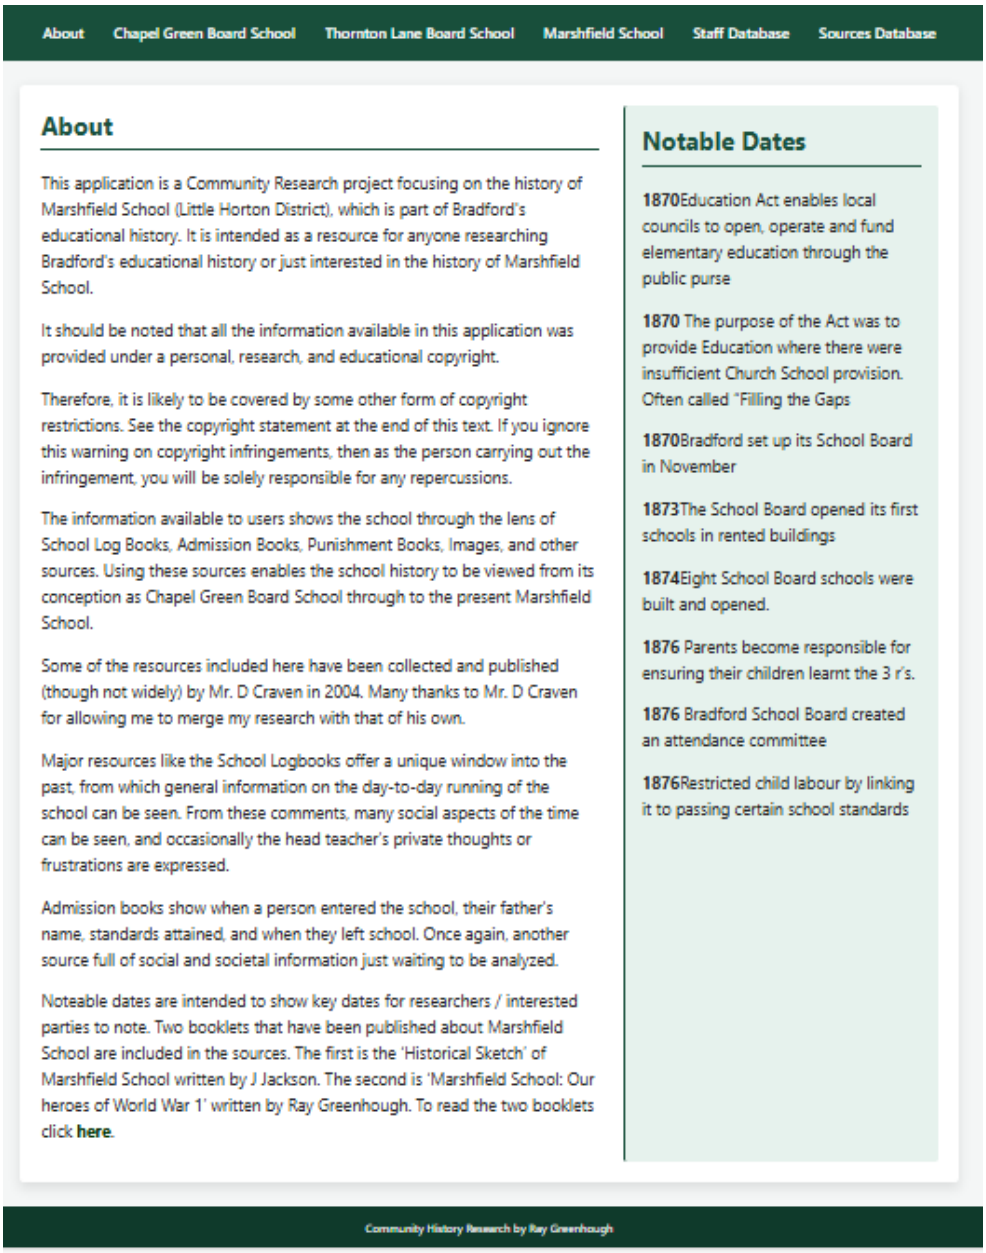

Figure 1: Homepage of Marshfield School Website

Viewing content:

The homepage contains the following main sections:

- Header which displays the website title, "Marshfield School History".
- Image Area displays the main school image.
- Navigation Bar allows users to move between different website pages.
- About Section explains the purpose of the project and describes the historical resources included in the system.

- Notable Dates Section displays key dates related to Bradford's educational history.
- Footer displays the text "Community History Research by Ray Greenhough".

Opening Links

- The About section contains a hyperlink labelled **"here"**. When clicked, this opens **Page 1a**, which contains the two published booklets related to Marshfield School.

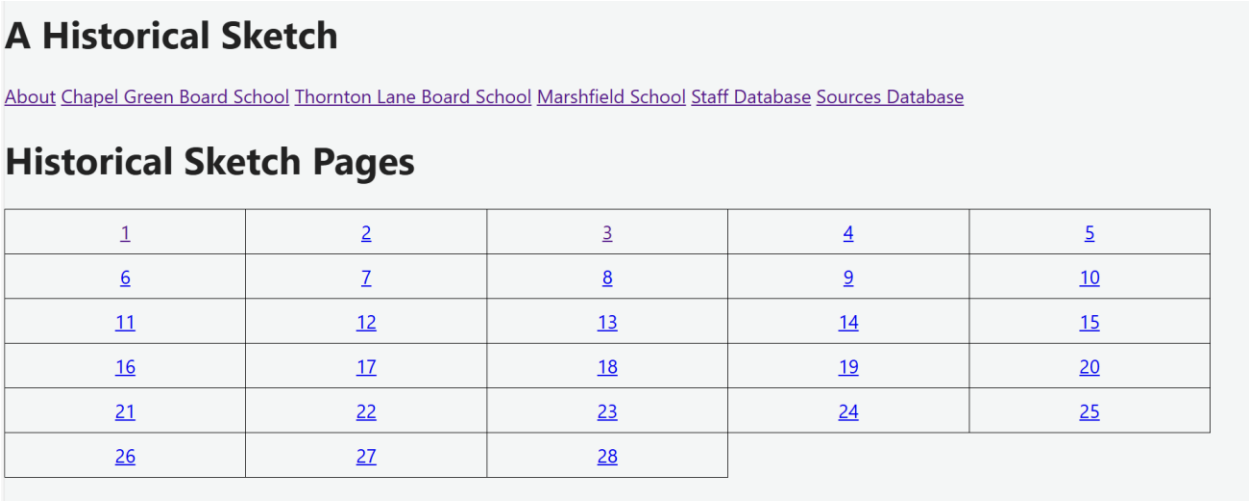

Figure 2: Hyperlink in the About section used to open Page 1a

Expected Behavior

- The homepage should be loaded without errors.
- The image should be displayed correctly.
- The navigation buttons should open the correct pages.
- The About and Notable Dates sections should display clearly.
- The hyperlink to Page 1a should work correctly.

Editing and Maintaining the Homepage

This section explains how the homepage can be updated if the client or a future developer wants to change the page of text, image, navigation links, or layout.

Files Used for the Homepage

The homepage uses the following main files:

- `index.html` – contains the structure and content of the homepage
- `css/style.css` – controls the colours, layout, spacing, and design of the page

1. Header Section

```
<header>
    <h1>Marshfield School History</h1>
</header>
```

Purpose:
Displays the main heading at the top of the page.

How to edit:

- Change the text inside `<h1>` to update the heading.
- To change the header colour, font, or spacing, edit the relevant section in `css/style.css`.

2. Image Section

```
<div class="container" id="image-area">
    <img src="Images/Marshfield_School.jpg" alt="Marshfield School">
</div>
```

Purpose:
Displays the main image on the homepage.

How to edit:

- Replace the image file in the `Images` folder.
- If the file name changes, update the `src` value.
- Update the `alt` text if the image is changed.

3. Navigation Bar

```
<nav>
    <a class="nav-button" href="index.html">About</a>
    <a class="nav-button" href="page2.html">Chapel Green Board School</a>
    <a class="nav-button" href="page3.html">Thornton Lane Board School</a>
```

```
    <a   class="nav-button"   href="page4.html">Marshfield   School</a>
    <a  class="nav-button"  href="page5_staff.html">Staff  Database</a>
    <a       class="nav-button"       href="page6_sources.html">Sources
Database</a>
</nav>
```

Purpose:
Allows users to move between different pages of the website.

How to edit:

- Change the page link inside `href` if the page name changes.
- Change the text between `<a>` tags to rename a navigation button.

To add a new page link:

```
<a class="nav-button" href="page7.html">New Page</a>
```

4. About Section

```
<div                                                class="column-left">
    <h2>About</h2>
```

Purpose:
Explains the purpose of the project and provides background information about the historical resources included in the website.

How to edit:

- Change the text inside the `<p>` tags.
- Keep the hyperlink if Page 1a is still needed.
- If the linked page changes, update the `href` value.

Example hyperlink used in this section:

```
<a class="index-link" href="page1a.html">here</a>
```

5. Notable Dates Section

```
<div                                               class="column-right">
    <h2>Notable Dates</h2>
```

Purpose:
Displays important dates and historical events.

How to edit:

- Change the text inside the `<p>` tags.
- Add more dates by copying and pasting another paragraph.

Example:

```
<p><strong>1880</strong> Example historical event</p>
```

6. Footer Section

```
<footer>
    Community History Research by Ray Greenhough
</footer>
```

Purpose:
Displays the footer text at the bottom of the page.

How to edit:

- Change the text inside the `<footer>` tags if needed.

Important Maintenance Notes

When making changes to the homepage, the following should always be checked:

- the image file path is correct
- navigation links still point to the right pages
- the hyperlink to Page 1a still works
- text changes do not break the layout
- the page is tested after changes are made

Summary

The homepage can be maintained by editing:

- `index.html` for text, links, and page structure
- `css/style.css` for colours, spacing, layout, and appearance

This allows the homepage to be updated in future if the client wants to change the content, replace the image, or add more navigation options.

Page 1a: Historical Sketch Page

Using Page 1a

Page 1a allows users to view booklet pages related to Marshfield School history. It contains two tables. The first table includes clickable page numbers for A Historical Sketch booklet, and the second table shows page numbers for Marshfield School: Our Heroes of WW1.

Steps to Use Page 1a

1. Open the website in a web browser. Marshfield School History
2. From the homepage, click the “here” link in the About section.
3. Page 1a will open.
4. In the Historical Sketch Pages table, click a page number to open the selected booklet page.
5. In the Marshfield School: Our Heroes of WW1 table, users can view the page numbers listed.

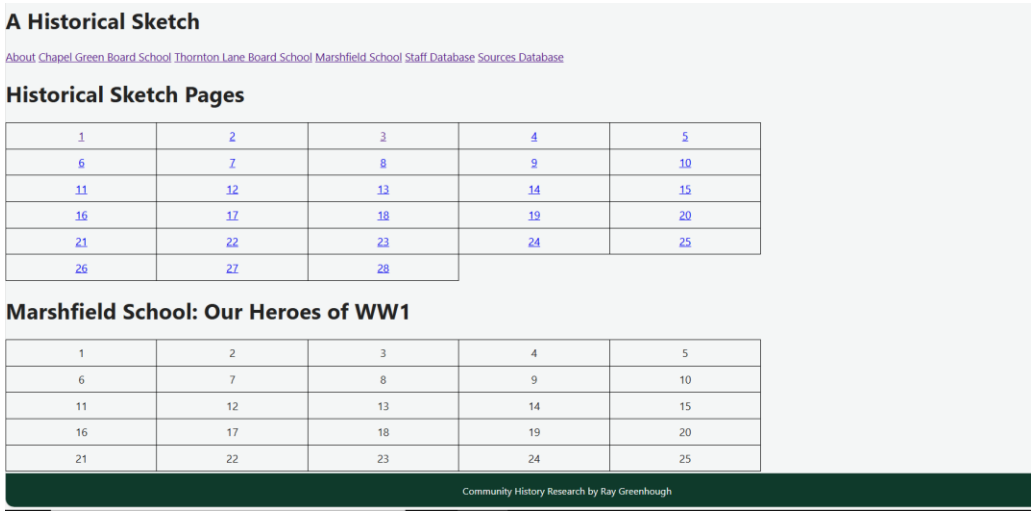

Figure 3: Page 1a showing Historical Sketch and WW1 tables

Viewing Content

The page contains the following main sections:

- Header displays the title of the page.
- Navigation Bar allows users to move to the other pages of the website.

- Historical Sketch Pages Table displays clickable page numbers that link to booklet images.
- WW1 Heroes Table displays page numbers for the second booklet.
- Footer displays the footer text at the bottom of the page

Opening Links

The first table contains hyperlinks. When a user clicks a page number, the corresponding booklet image opens.

Expected Behaviour

- Page 1a should load without errors.
- The navigation buttons should open the correct pages.
- Clicking a page number in the Historical Sketch table should open the correct image.
- Both tables should display clearly.

Editing and Maintaining Page 1a

This section explains how the page can be updated if the client or a future developer wants to edit the page title, navigation bar, tables, or links.

Files Used for Page 1a

The page uses the following main files:

- page1a.html – contains the page structure, table layout, and links
- css/style.css – controls the colours, spacing, table layout, and page design

1. Header Section

```
<div id="header">
   <h1>A Historical Sketch</h1>
</div>
```

Purpose:
Displays the main title at the top of the page.

How to edit:

- Change the title text inside <h1>
- To change the appearance of the header, edit the relevant CSS in style.css

2. Navigation Bar

```
<div id="nav-buttons">
  <a href="index.html">About</a>
  <a href="page2.html">Chapel Green Board School</a>
  <a href="page3.html">Thornton Lane Board School</a>
  <a href="page4.html">Marshfield School</a>
  <a href="page5_staff.html">Staff Database</a>
  <a href="page6_sources.html">Sources Database</a>
</div>
```

Purpose:
Allows users to navigate to the other pages of the website.

How to edit:

- Change the page link inside href
- Change the button text between the <a> tags

To add a new navigation button:

```
<a href="page7.html">New Page</a>
```

3. Historical Sketch Table

```
<table class="page-table">
   <tr>
      <td><a href="Images\Booklets\Historical_Sketch\Page1.jpg">1</a></td>
      <td><a href="Images\Booklets\Historical_Sketch\Page 2.jpg">2</a></td>
   </tr>
</table>
```

Purpose:
Displays page numbers as clickable links to booklet images.

How to edit:

- To change the displayed number, edit the text between <a> tags
- To change the linked file, edit the file path inside href

Example:

```
<a href="Images\Booklets\Historical_Sketch\Page 3.jpg">3</a>
```

4. How to Add More Table Rows or Columns

To add another column in the same row:

```
<td><a href="Images\Booklets\Historical_Sketch\Page 29.jpg">29</a></td>
```

To add another row, copy and paste a full <tr> ... </tr> block and update the page numbers and links.

Example:

```
<tr>
  <td><a href="Images\Booklets\Historical_Sketch\Page 30.jpg">30</a></td>
  <td><a href="Images\Booklets\Historical_Sketch\Page 31.jpg">31</a></td>
</tr>
```

5. WW1 Heroes Table

```
<table class="page-table">
  <tr>
    <td>1</td><td>2</td><td>3</td><td>4</td><td>5</td>
  </tr>
</table>
```

Purpose:
Displays page numbers for the second booklet.

How to edit:

- Change the numbers inside the <td> cells
- If hyperlinks are needed later, replace the number with a link

Example:

```
<td><a href="Images\Booklets\WW1_Heroes\Page1.jpg">1</a></td>
```

6. Footer Section

```
<div class="footer">
   Community History Research by Ray Greenhough
</div>
```

Purpose:
Displays the footer text at the bottom of the page.

How to edit:

- Change the text inside the footer if needed

Important Maintenance Notes

When making changes to Page 1a, the following should always be checked:

- all file paths are correct
- the page numbers match the correct linked files
- any new rows or columns are added inside the correct table structure
- navigation links still point to the correct pages
- the page is tested after changes are made

Summary

Page 1a can be maintained by editing:

- page1a.html for page titles, tables, numbers, and hyperlinks
- css/style.css for layout, colours, spacing, and table appearance

This allows the page to be updated if the client wants to add more booklet pages, add links to the WW1 booklet, or change the table layout.

Page 2: Chapel Green Board School

Using Page 2

This page displays historical information and allows users to open linked sources.

Steps to Use Page 2

1. Open Page 2 from the navigation menu
2. Read the historical text displayed
3. Click highlighted links to open sources

Viewing Content

- Left side shows historical text
- Right side shows notable dates
- Links open images or documents

About | Chapel Green Board School | Thornton Lane Board School | Marshfield School | Staff Database | Sources Database

Chapel Green Board School

About

Links for sources available for this school are at the end of the text.

Chapel Green district was populated largely by people in the textile or mining occupations. It could be described as a poor area by today's standards. Education in the immediate area consisted of the Chapel Green Church School, which appears to have been overcrowded and understaffed. Other schools were about a mile away.

Residents in the area **petitioned** the School Board to open another school in the area. A **survey** of school accommodation in the area identified that there was a deficiency of 370 places.

Subsequently a new school was opened on Mon 10 Sept 1877 in rented premises within the same building as the Church School, which is now a Hindu **Temple**

The new school was called Chapel Green Board School and had an Infants and Junior (Mixed) departments. They occupied the ground floor (see the **plan)**. whilst the Church School had the upper floor (see the **plan)**.

The school was to become popular and achieved good attainments. After being open a few year the school began to run out of space and soon various lack of space issues were being reported in the government annual inspection reports. The School Board started discussions about building a new school rather than renting larger promises. Church members on the School Board were opposed to building a new school. Eventually building a new school was voted on and the search for a site, design and quotes began. This school closed on 29/10/1886

- **Junior 1877 – 1910**
  [Pages 1 to 81 cover this school]

Chapel Green Church School Logbook

Chapel Green Church School Logbook: also contains valuable

Notable Dates

1877 – Chapel Green School opened on 10 Sept 1877 .

1880 – Elementary education was made compulsory for 5 – 13-year-olds .

1880 – Minimum leaving age was a 10, providing they had attained standard 5.

1880 – Part time schooling allowed if they had attained standard 2

Figure 4: Showing Chapel Green Board School

Opening Links

- Click any highlighted word
- This will open an image or document

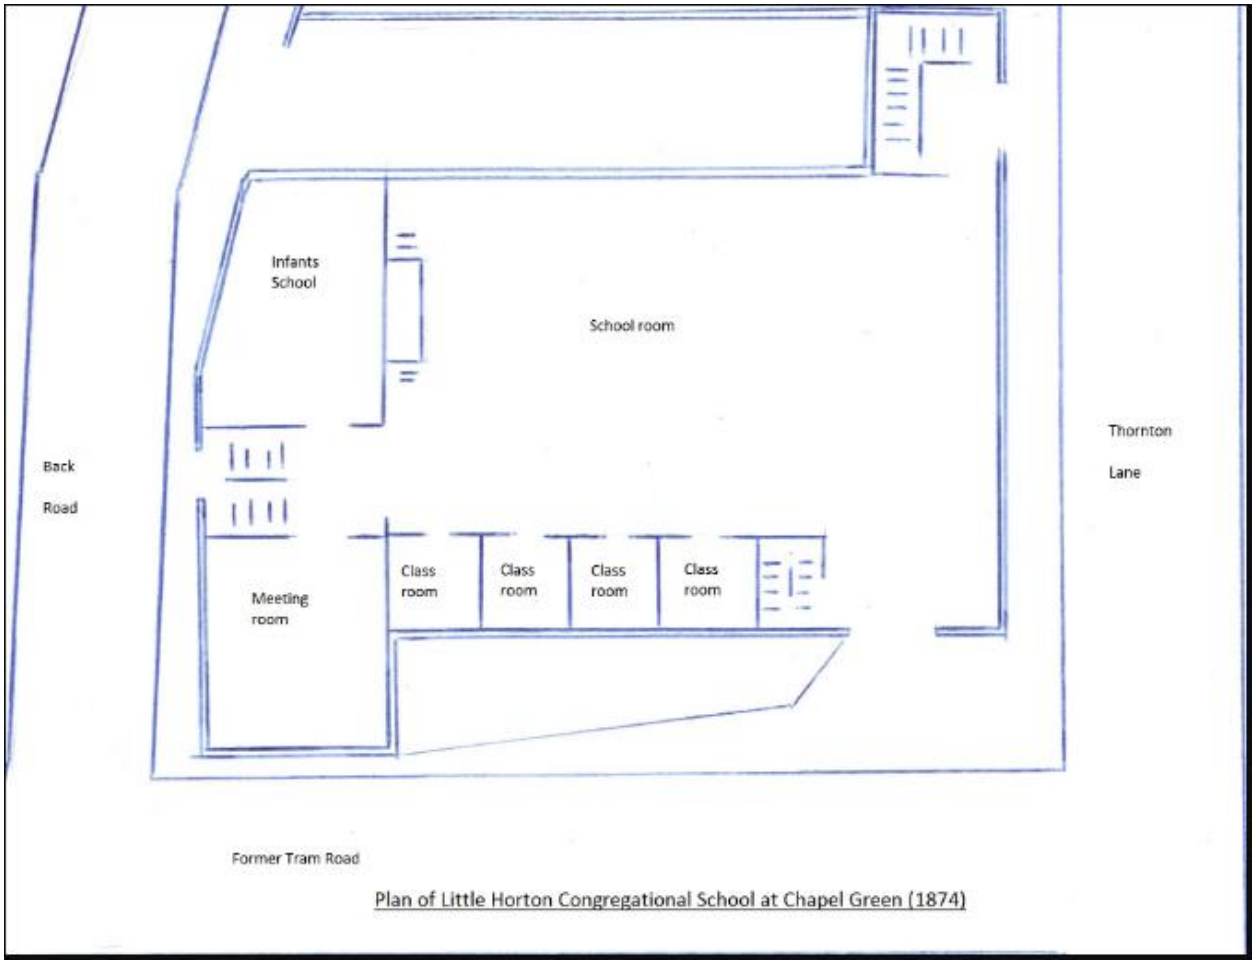

Figure 5: Showing the working link from the page

Expected Behaviour

- Page loads correctly
- Links open the correct files
- Content is displayed clearly

Editing and Maintaining Page 2

Files Used

- `page2.html`
- `css/style.css`

1. Editing Text

Text is inside `<p>` tags.

To edit:

- Change content inside `<p>`
- Keep `<a>` tags if you want links

2. Adding Hyperlinks

```
<a href="Images/Folder/File.jpg">text</a>
```

Purpose:
Links text to files.

3. File Structure

All files are stored like:

```
Images/FolderName/FileName
```

How to add new files

1. Place file in correct folder
2. Copy file path
3. Add to `href`

Important Notes

- Do not remove HTML structure
- Only change content inside tags

- Always test links after editing

Page 3: Thornton Lane Board School

Using Page 3

Page 3 provides historical information about Thornton Lane Board School and gives users access to related sources such as logbooks, admission registers, and references.

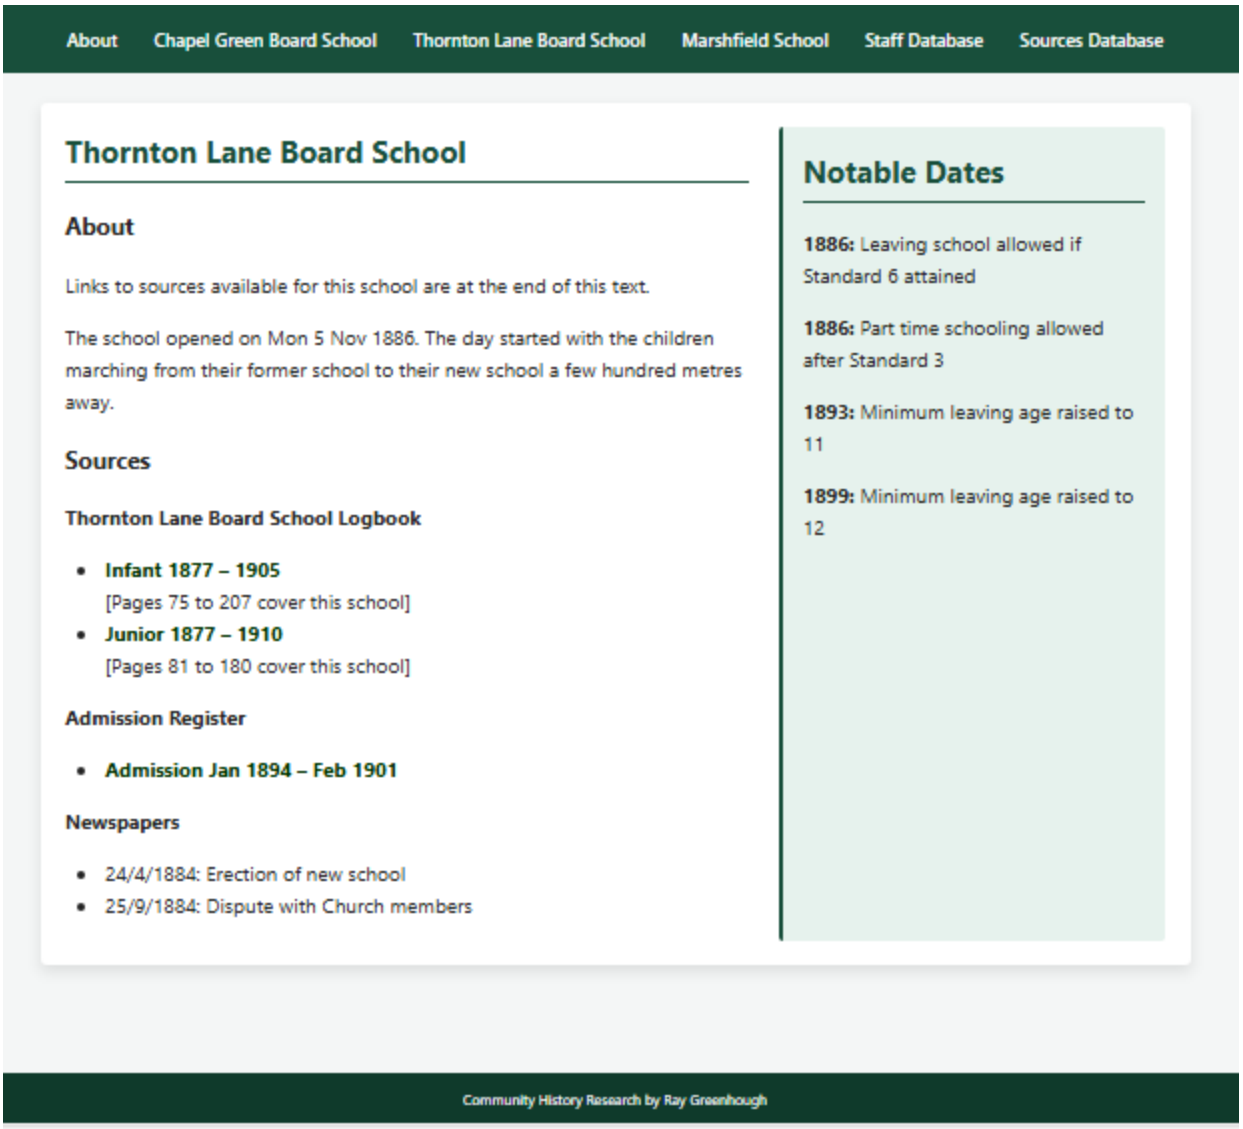
Steps to Use Page 3

1. Open the website in a web browser.
2. From the navigation menu at the top of the page, click “Thornton Lane Board School”.
3. The page will load automatically.
4. Read the About section for background information.
5. Scroll down to the Sources section.
6. Click on any of the links provided to open the related documents or pages.

Viewing Content

The page contains the following main sections:

- Header displays the page title.
- Image Area displays an image related to the school.
- Navigation Bar allows users to move between different pages of the website.
- About Section provides background information about Thornton Lane Board School.
- Sources Section contains links to:
    - logbooks (PDF files)
    - admission register pages
    - historical references
- Notable Dates Section displays important dates related to the school.
- Footer displays the footer text at the bottom of the page.



About | Chapel Green Board School | Thornton Lane Board School | Marshfield School | Staff Database | Sources Database

Thornton Lane Board School

About

Links to sources available for this school are at the end of this text.

The school opened on Mon 5 Nov 1886. The day started with the children marching from their former school to their new school a few hundred metres away.

Notable Dates

1886: Leaving school allowed if Standard 6 attained

1886: Part time schooling allowed after Standard 3

1893: Minimum leaving age raised to 11

1899: Minimum leaving age raised to 12

Community History Research by Ray Greenhough

Figure 6: Thornton lane board school showing the content and links

Opening Links

The page contains hyperlinks to both PDF files and internal pages.
Examples include:

- PDF logbooks:
  - *Infant 1877–1905*
  - *Junior 1877–1910*
- Internal page:
  - page3a.html for admission registers

When a user clicks:

- a PDF link, the document opens (often at a specific page)
- an internal link, a new webpage opens

22 October 1886

The discipline has been rather lax during the week in some classes.
The teachers not very punctual.

29 October 1886

Mr Hanson, Chairman of School Management Committee, visited the school on Tuesday morning.
The lady superintendant visited the school on Wednesday morning and examined the girls sewing.
School closed for the week at 12am in order to allow furniture to be removed to the Thornton Lane School which is to be opened on Monday.

Thornton Lane Mixed Board School

5 November 1886

The scholars have been transferred from the temporary school at Chapel Green.
This school was opened on Monday by S.P. Myers Esq., Chairman of the School Board. Mr Hanson, Member of Board, Mr Taylor, Superintendant of Schools and Mr Palmer, Clerk, were also present.
In honour of the event the remainder of the day was granted as a holiday.
Mr Cowley, Music Superintendant, visited the school on Friday and examined the children in Music.
The children are rather irregular in their attendance especially on Monday morning and Friday afternoon.

Figure 7: Junior 1877 – 1910 showing the link

Expected Behaviour

- The page should load without errors.
- The image should display correctly.
- The navigation buttons should work correctly.
- Clicking a PDF link should open the correct document.
- Clicking an internal link should open the correct page.
- The Notable Dates section should display clearly.

Editing and Maintaining Page 3

This section explains how Page 3 can be updated if the client or a future developer wants to change the content, links, or layout.

Files Used for Page 3

- page3.html – contains the page structure, text, and links

- css/style.css – controls layout, colours, spacing, and design

1. Header Section

```
<header>
  <h1>Marshfield School</h1>
</header>
```

Purpose:

Displays the main heading at the top of the page.

How to edit:

- Change the text inside <h1>
- Edit styling in style.css if needed

2. Image Section

```
<img src="Images/Marshfield_School.jpg" alt="Marshfield School">
```

Purpose:

Displays the main image on the page.

How to edit:

- Replace the image file in the Images folder
- Update the src if the filename changes
- Update the alt text if needed

3. Navigation Bar

```
<nav>
  <a class="nav-button" href="index.html">About</a>
  <a class="nav-button" href="page2.html">Chapel Green Board School</a>
  <a class="nav-button" href="page3.html">Thornton Lane Board School</a>
  <a class="nav-button" href="page4.html">Marshfield School</a>
</nav>
```

Purpose:

Allows users to navigate between pages.

How to edit:

- Change links inside href
- Change button text between <a> tags

4. About Section

```
<h3>About</h3>
<p>...</p>
```

Purpose:
Provides background information about the school.
How to edit:

- Modify text inside tags
- Add additional paragraphs if needed

5. Sources Section

<a class="index-link" href="Images/Logbooks/Infant_1877 -1905.pdf#page=75">
Purpose:
Provides links to logbooks, admission registers, and other sources.
How to edit:

- Change the link text between <a> tags
- Update the file path inside href

To add a new source:
<li>
<a class="index-link" href="newfile.pdf">New Source</a>
</li>

6. Admission Register Link

<a class="index-link" href="page3a.html">
Purpose:
Links to another page containing admission records.
How to edit:

- Change the linked page name if needed
- Update the text shown to users

7. Notable Dates Section

1886: Leaving school allowed...
Purpose:
Displays key historical dates.
How to edit:

- Change text inside tags
- Add new dates by copying an existing line

8. Footer Section

<footer>
Community History Research by Ray Greenhough
</footer>

Purpose:
Displays footer text.
How to edit:

- Modify the text if required

Important Maintenance Notes

When editing Page 3, ensure that:

- all file paths are correct
- PDF links open correctly
- internal page links work
- text changes do not break layout
- the page is tested after changes

Summary

Page 3 can be maintained by editing:

- page3.html for text, links, and structure
- css/style.css for layout and design

Page 4: Marshfield School

Using Page 4

Page 4 provides historical information about Marshfield School and gives users access to linked records such as logbooks, admission registers, and the punishment book. The page contains multiple links to logbooks, admission registers, and other records. Only one example is shown below, as all links follow the same structure.

Steps to Use Page 4

1. Open the website in a web browser.
2. From the navigation menu at the top of the page, click “Marshfield School”.
3. The Marshfield School page will open.
4. Read the About section for background information about the school.
5. Use the lists of links under:
    - Logbooks
    - Admission Registers

- Punishment Book
  to open related child pages.

Marshfield School

About

With the incorporation of Thornton into the Bradford Borough the Thornton School Board identified that there would be confusion with two Thornton School names and two Bradford School names. The Thornton Board changed the name of James Street School (to avoid confusion with St James School in Bradford) to Thornton Board School. The Board also recommended that Thornton Lane Board School be changed to Marshfield School to avoid confusion the newly named Thornton Board School.

Logbooks

- **Logbook 1877-1905 Infant**
- **Logbook 1905-1939 Infant**
- **Logbook 1939-1966 Infant**
- **Logbook 1966-1973 Infant**
- **Logbook 1877-1910 Junior**
- **Logbook 1910-1933 Junior**
- **Logbook 1933-1964 Junior**

Admission Registers

- **Infant Sep 1944 – Jan 1954**
- **Infant Sep 1954 – Jul 1965**
- **Infant Sep 1965 – Jan 1973**
- **Junior Apr 1906 – Jul 1911**
- **Junior Aug 1911 – Jul 1917**
- **Junior Aug 1928 – Jan 1944**
- **Junior Mar 1944 – Feb 1954**
- **Junior Mar 1954 – Jan 1963**
- **Junior Oct 1963 – Sep 1971**
- **Junior Sep 1971 – Sep 1973**
- **Senior 1901 – 1928**

Punishment Book

- **Punishment 1903 – 1965**

Notable Dates

1870 – Bradford School Board established.

1877 – Marshfield School logbooks begin.

1903 – Punishment book records begin.

1973 – Final infant and junior logbooks.

Community History Research by Ray Greenhough

Figure 8: Marshfield School page showing historical content and linked records

Viewing Content

The page contains the following main sections:

- Header displays the page title.
- Image Area displays an image of Marshfield School.
- Navigation Bar allows users to move between the different pages of the website.
- About Section explains the background to the Marshfield School name and history.
- Logbooks Section contains links to infant and junior logbook pages.
- Admission Registers Section contains links to the admission register pages.
- Punishment Book Section contains a link to the punishment book page.
- Notable Dates Section displays important historical dates related to Marshfield School.
- Footer displays the footer text at the bottom of the page.

Opening Links

The page contains hyperlinks in the Logbooks, Admission Registers, and Punishment Book sections.

When a user clicks one of these links, the related child page will open.

Examples include:

- page4r.html for Logbook 1877–1905 Infant
- page4a.html for Logbook 1905–1939 Infant
- page4q.html for Punishment 1903–1965

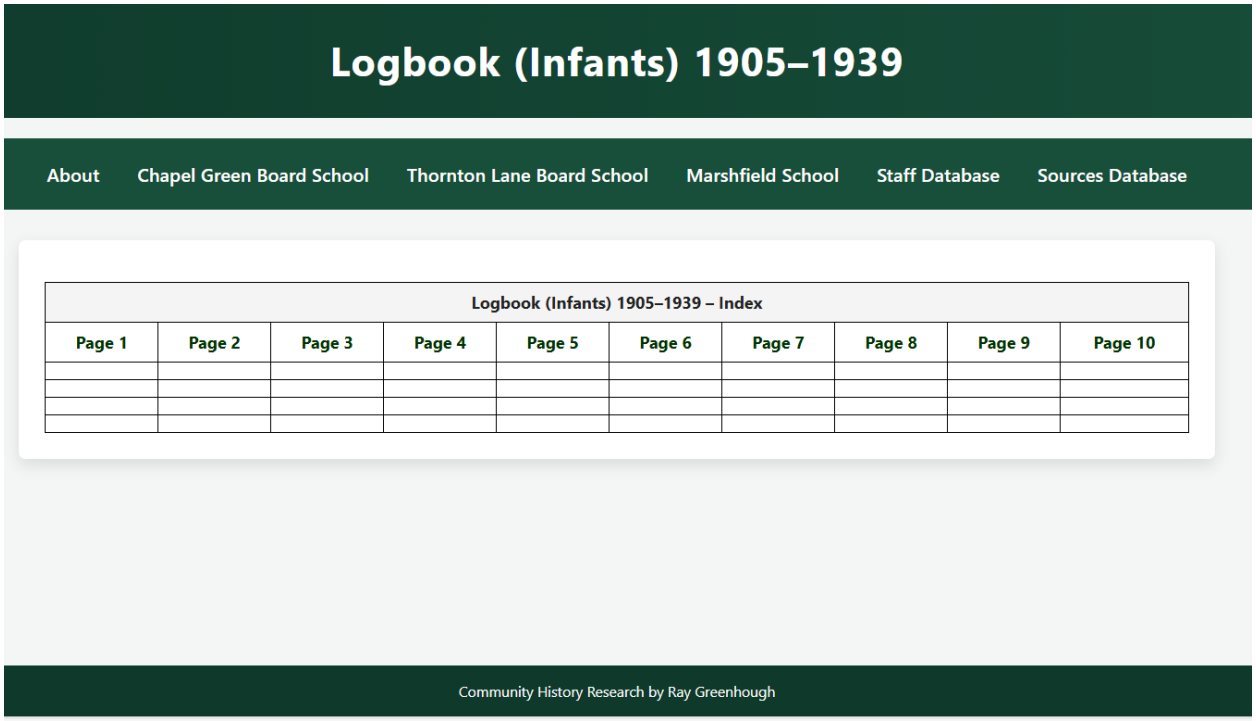

Figure 9: Example of a logbook page opened from the Marshfield School page

Expected Behaviour

- The page should load without errors.
- The image should display correctly.
- The navigation buttons should work correctly.
- The lists of links should open the correct child pages.
- The Notable Dates section should display clearly.

Editing and Maintaining Page 4

This section explains how Page 4 can be updated if the client or a future developer wants to change the content, image, links, or layout.

Files Used for Page 4

The page uses the following main files:

- page4.html – contains the structure and content of the page
- css/style.css – controls the colours, layout, spacing, and design of the page

1. Header Section

```
<header>
<h1>Marshfield School</h1>
</header>
```

Purpose:
Displays the main title at the top of the page.

How to edit:

- Change the text inside <h1>
- To change the design of the header, edit the relevant CSS in style.css

2. Image Section

```
<div class="container" id="image-area">
<img src="Images/Marshfield_School.jpg" alt="Marshfield School">
</div>
```

Purpose:
Displays the main image for Marshfield School.

How to edit:

- Replace the image file in the Images folder
- If the filename changes, update the src value
- Update the alt text if needed

3. Navigation Bar

```
<nav>
<a class="nav-button" href="index.html">About</a>
<a class="nav-button" href="page2.html">Chapel Green Board School</a>
<a class="nav-button" href="page3.html">Thornton Lane Board School</a>
<a class="nav-button" href="page4.html">Marshfield School</a>
<a class="nav-button" href="page5_staff.html">Staff Database</a>
<a class="nav-button" href="page6_sources.html">Sources Database</a>
</nav>
```

Purpose:
Allows users to move between the main pages of the website.

How to edit:

- Change the linked page inside href
- Change the text between the <a> tags

To add a new page link:

```
<a class="nav-button" href="page7.html">New Page</a>
```

4. About Section

```
<h2>Marshfield School</h2>
<h3>About</h3>
<p>...</p>
```

Purpose:
Explains the historical background of Marshfield School.

How to edit:

- Change the text inside the <p> tags
- Add more paragraphs if required

5. Logbooks Section

```
<h3>Logbooks</h3>
<ul>
<li><a class="index-link" href="page4r.html">Logbook 1877-1905 Infant</a></li>
</ul>
```

Purpose:
Provides links to child pages containing logbook records.

How to edit:

- Change the text shown to users between the <a> tags
- Change the child page link inside href

To add another logbook link:

```
<li><a class="index-link" href="page4x.html">New Logbook</a></li>
```

6. Admission Registers Section

```
<h3>Admission Registers</h3>
<ul>
```

```
<li><a class="index-link" href="page4f.html">Infant Sep 1944 – Jan 1954</a></li>
</ul>
```

Purpose:
Provides links to admission register child pages.

How to edit:

- Change the text inside the <a> tags
- Change the href value if the file name changes
- Add more <li> items if new register pages are added

7. Punishment Book Section

```
<h3>Punishment Book</h3>
<ul>
<li><a class="index-link" href="page4q.html">Punishment 1903 – 1965</a></li>
</ul>
```

Purpose:
Provides a link to the punishment book page.

How to edit:

- Change the displayed link text
- Change the linked page inside href

8. Notable Dates Section

```
<div class="column-right">
<h2>Notable Dates</h2>
<p><strong>1870</strong> – Bradford School Board established.</p>
</div>
```

Purpose:
Displays important historical dates related to Marshfield School.

How to edit:

- Change the text inside each <p> tag
- Add more dates by copying and pasting another paragraph

Example:

1885 – Example historical event.

9. Footer Section

<footer>
Community History Research by Ray Greenhough
</footer>

Purpose:
Displays the footer text at the bottom of the page.

How to edit:

- Change the footer text if required

Important Maintenance Notes

When making changes to Page 4, the following should always be checked:

- the image file path is correct
- the navigation links still work
- all child page links open the correct pages
- text changes do not break the layout
- the page is tested after changes are made

Page 5: Staff Database

Using the Staff Page

The Staff page allows users to search for staff records stored in the system database by applying different filters.

Steps to Use the Staff Page

1. Open the website in a web browser
2. From the navigation menu at the top of the page, click **"Staff Database"**
3. The Staff Search form will appear

Selecting Search Filters

Users can search using one or more of the following fields:

- **School Name**
  Select a school from the dropdown list (e.g. Marshfield School)
- **Department**
  Select a department (e.g. Junior, Infant, Admin)
- **Last Name**
  Type a surname into the text box
- **Position**
  Select a staff role (e.g. Head Mistress, Assistant Mistress)
- **Start Year**
  Enter a year value to filter records

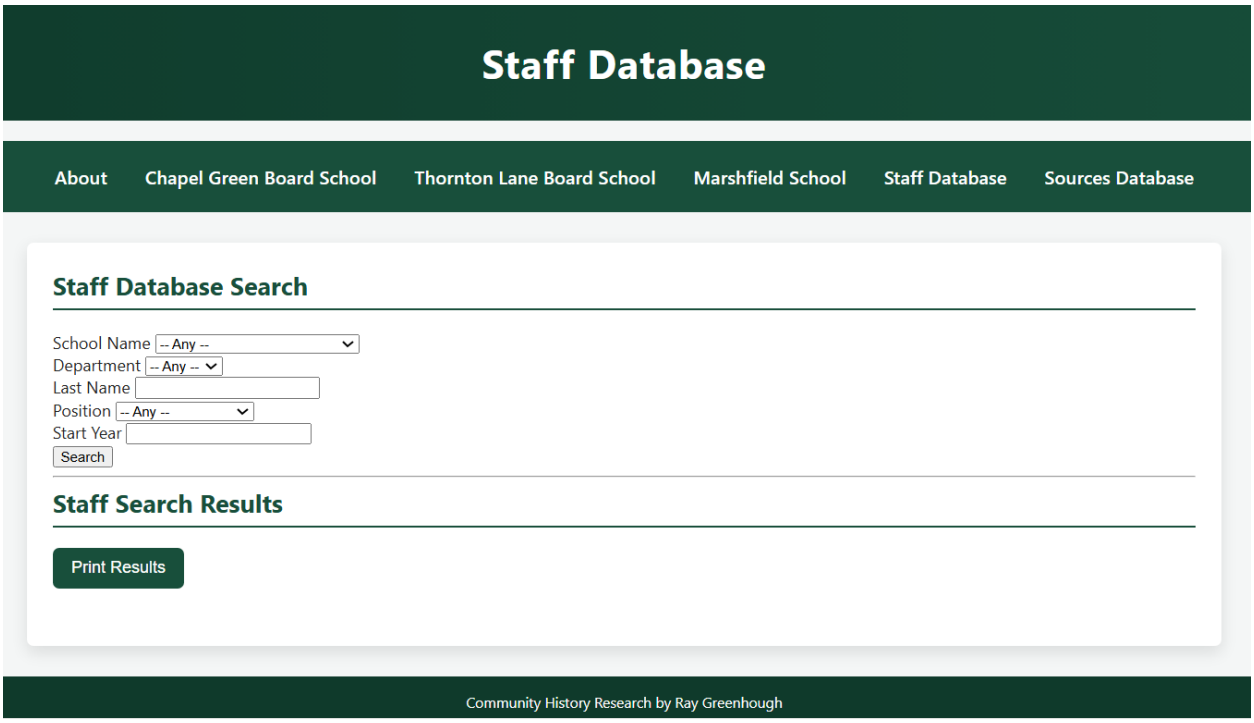

Figure 10: Staff Database search form with filtering options

Performing a Search

4. After selecting the required filters, click the Search button
5. The system will process the request and display the results below

Viewing Results

- The results will appear in the Staff Search Results section

- Each result is displayed in a structured format showing:
    - Name
    - Title
    - School
    - Department
    - Position
    - Address
    - Year recorded
    - Notes
- A summary of the total number of results is also displayed

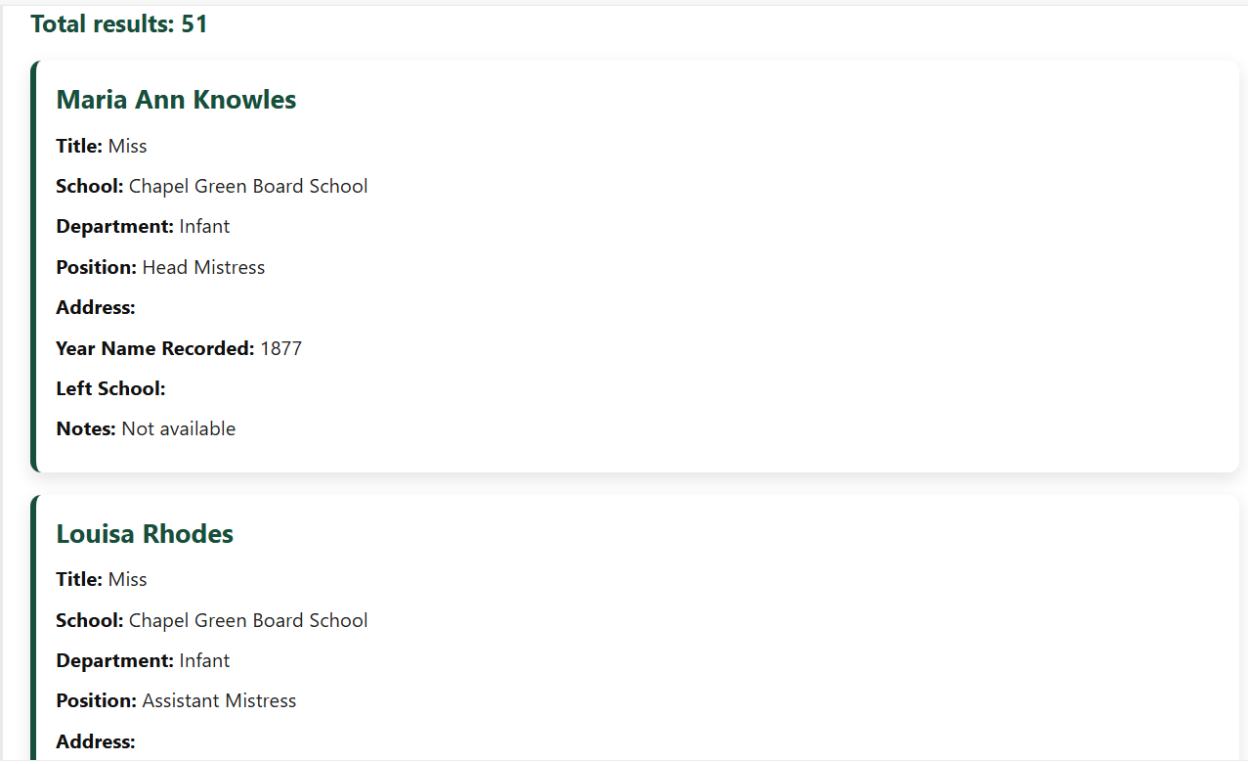

Figure 11: showing the results from staff database

Printing Results

- Click the Print Results button
- The browser print window will open

- The user can print or save the results

Expected Behaviour

- If matching records are found → they are displayed clearly
- If no records are found → a message is shown
- If no filters are selected → all available records will be displayed

Notes for Users

- Searches are not case-sensitive (e.g. “smith” and “Smith” will return the same results)
- Partial names can be used (e.g. typing “Smi” will match “Smith”)
- Results will automatically scroll into view after searching

Editing and Maintaining the Staff Page

This section explains how changes can be made to the Staff page if the client or a future developer wants to update the search form, the displayed results, or the page design.

Files used for the Staff page

The Staff page uses the following main files:

- page5_staff.html contains the structure of the page, the search form, and the JavaScript search logic
- css/style.css controls the colours, layout, spacing, and styling of the page
- Supabase database table Staff stores the staff records shown in the search results

How to change text on the page

To change visible text on the Staff page, open page5_staff.html.

Text that can be changed includes:

- the page title shown in the browser tab:

```
<title>Staff Database</title>
```

- the main heading:

```
<h1>Staff Database</h1>
```

- the search section heading:

```
<h2>Staff Database Search</h2>
```

- the results heading:

```
<h2>Staff Search Results</h2>
```

- button text such as:

```
<button type="submit">Search</button>
```

and

```
<button type="button" onclick="printResults()">Print Results</button>
```

After changing the text, save the file and refresh the page in the browser to view the update.

How to change the search options

The search options are written inside the form in page5_staff.html.

For example, the school names are stored inside the <select> dropdown:

```
<option value="Marshfield School">Marshfield School</option>
<option value="Thornton Lane Board School">Thornton Lane Board School</option>
<option value="Chapel Green Board School">Chapel Green Board School</option>
```

If the client wants to:

- add a new school
- remove a school
- change the wording of an option

this can be done by editing the <option> lines.

The same applies to other dropdown fields such as:

- Department
- Position

How to change the input fields

The Staff page currently contains these search fields:

- School Name
- Department
- Last Name
- Position

- Start Year

If a field needs to be added, removed, or renamed, this must be changed in two places:

1. In the HTML form

This controls what the user sees on the page.

For example:

```
<label>Last Name</label>
<input type="text" id="LastName" name="LastName">
```

2. In the JavaScript search logic

This controls how the search is sent to the database.

For example:

```
const lastName = document.getElementById("LastName").value.trim();
```

and

```
if (lastName !== "") {
  query = query.ilike("Last Name", `%${lastName}%`);
}
```

If a new search field is added, both the HTML form and the JavaScript query must be updated.

How to change the database search logic

The Staff page connects to Supabase and searches the Staff table.

This line starts the search:

```
let query = client.from("Staff").select("*");
```

The filters are then applied depending on what the user enters.

Examples:

```
query = query.eq("School Name", schoolName);
```

This means the search will only show records with the exact selected school name.

```
query = query.ilike("Last Name", `%${lastName}%`);
```

This means the search will look for any last name containing the text typed by the user.

If the client wants to change how searching works, the JavaScript query conditions can be edited.

This may be needed if:

- a database column name change
- a new filter is added
- the search should become stricter or broader

How to change the results shown on the page

The search results are built in JavaScript inside the data.forEach(row => { ... }) section.

Each result currently shows:

- First Name
- Last Name
- Title
- School
- Department
- Position
- Address
- Year Name Recorded
- Left School
- Notes

For example:

```
<span class="result-label">School:</span> ${row["School Name"] || ""}
```

If the client wants to:

- remove a field from the results
- add another field from the database
- change the order of information shown

this section should be edited.

How to change the styling and design

The design of the page is controlled by the linked CSS file:

```
<link rel="stylesheet" href="css/style.css">
```

To change the appearance of the page, open css/style.css.

This file can be edited to change:

- colours
- fonts
- spacing
- button appearance
- result box layout
- header and navigation design

For example, if the client wants a different colour scheme or bigger text, this should be changed in the CSS file.

How the print button works

The print button uses this function:

```
function printResults() {
  window.print();
}
```

This opens the browser print window and allows the user to print the search results.

If the client no longer wants this feature, the print button or the function can be removed.

Important maintenance notes

When making changes to the Staff page, the following should be checked:

- the Supabase table name is still correct
- the database column names match the code exactly
- any new form field is also added to the JavaScript logic
- the page is tested after changes are made

If the HTML form is changed without updating the JavaScript, the search may stop working properly.

Summary

The Staff page can be maintained by editing:

- page5_staff.html for text, form fields, and search logic
- css/style.css for styling and layout
- the Supabase Staff table for the data itself

This makes the page flexible and allows future updates to be made if the client wants to add more records, change the design, or improve the search features.

Page 6: Sources Database

The Sources page allows users to search for historical source records stored in the system database. Users can apply filters to narrow down the search and view matching source information.

Steps to Use the Sources Page

1. Open the website in a web browser.
2. From the navigation menu at the top of the page, click “Sources Database”.
3. The Sources Database Search form will appear.

Selecting Search Filters

Users can search using one or more of the following fields:

- **School Name**: Select a school from the dropdown list, such as Marshfield School, Thornton Lane Board School, or Chapel Green Board School.
- **Source Type**: Select the type of source, such as Logbook, Admissions Register, Photograph, or Map.
- **Department:** select a department, such as Junior, Infant, or Admin.
- **Keyword**: Type a word or phrase into the keyword box to search for matching text in the source title or notes.

Performing a Search

4. After selecting the required filters, click the **Search** button.

5. The system will process the request and display the results below the form.

Viewing Results

The results will appear in the Sources Search Results section. Each result is displayed in a structured format and may include:

- Source title
- Source type
- School
- Department
- Notes
- Hyperlink to view the source

A summary showing the total number of matching results is also displayed.

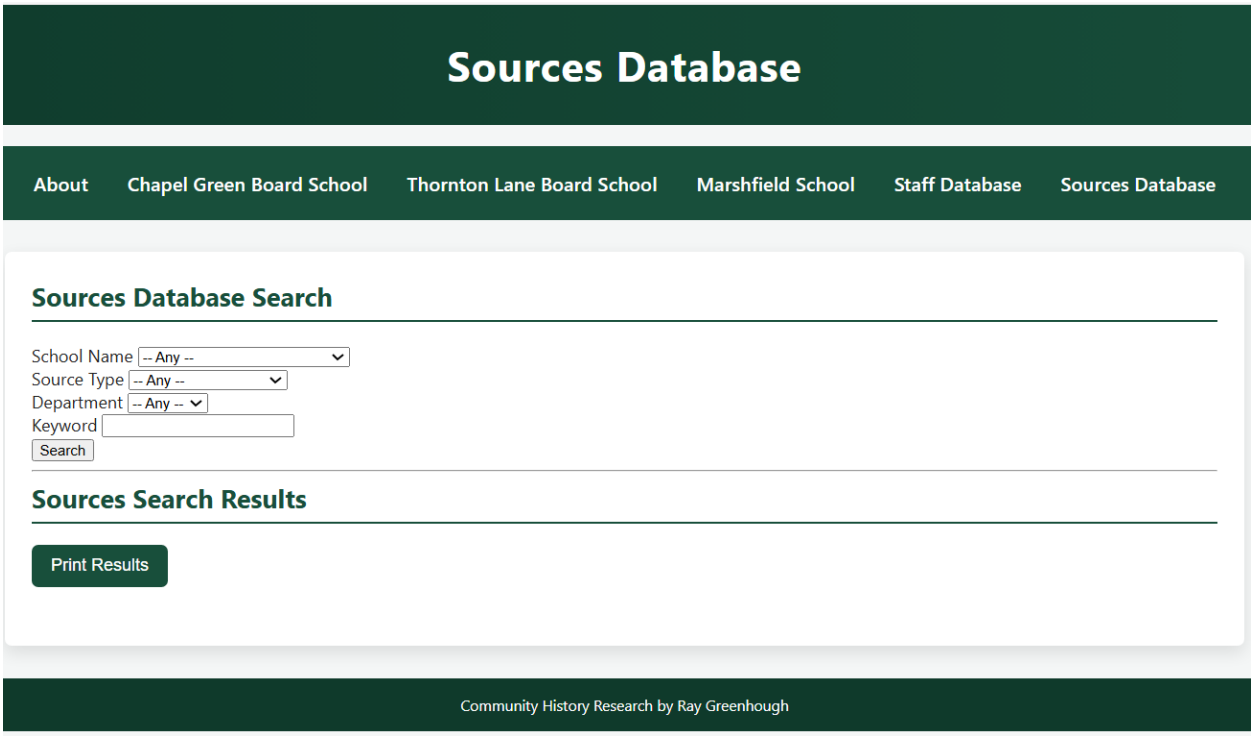

Figure 12: Sources Database search page showing available filters and layout

Opening a Source Link

If a record contains a hyperlink, the user can click “View Source” to open the source in a new browser tab.

If no hyperlink is available, the system will display “No link available”.

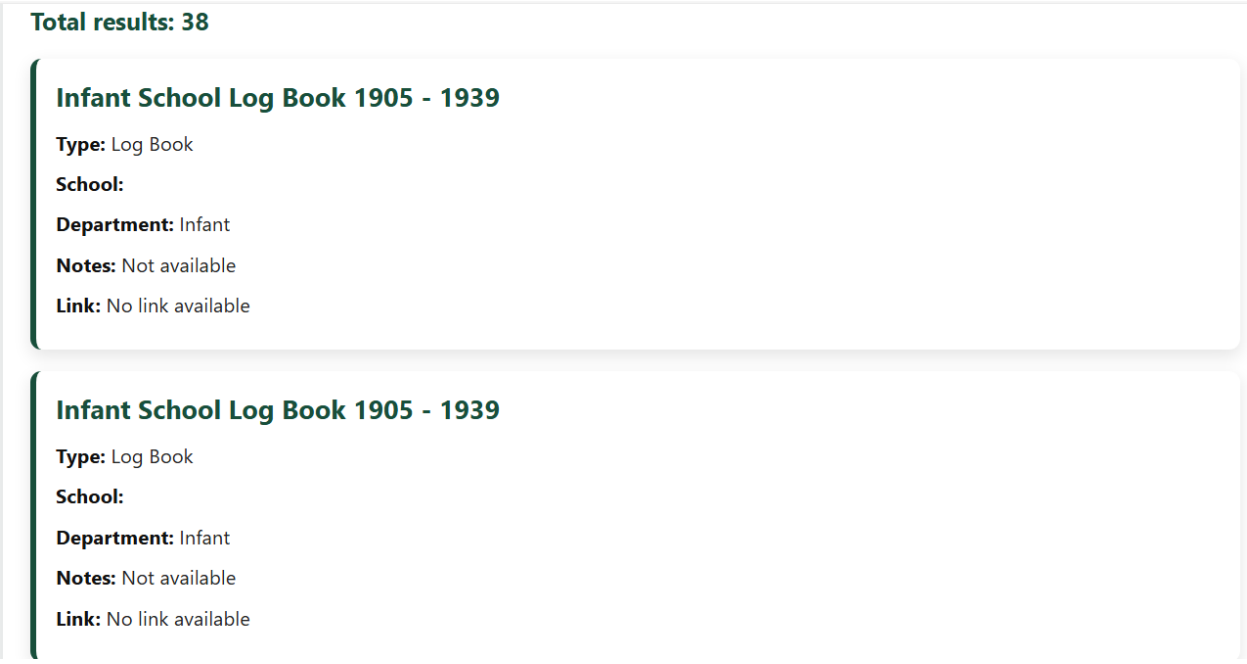

Figure 13: Sources Database search results displaying filtered source records

Printing Results

The page also contains a Print Results button.

- Click Print Results
- The browser print window will open
- The user can then print or save the results

Expected Behaviour

- If matching sources are found, they will be displayed clearly in the results section.
- If no matching sources are found, the message “No sources found” will be displayed.
- If no filters are selected, all available records may be shown depending on the stored data.

Notes for Users

- Searches are not case-sensitive, so uppercase and lowercase letters are treated the same.
- The keyword search checks both the Source field and the Notes field.
- After the search is completed, the page automatically scrolls down to the results section.

Editing and Maintaining the Sources Page

This section explains how the Sources page can be updated if the client or a future developer wants to change the page text, search filters, search logic, displayed results, or design.

Files used for the Sources page

The Sources page uses the following main parts:

- page6_sources.html this contains the page structure, the search form, and the JavaScript search logic
- css/style.css controls the design, layout, colours, and styling
- Supabase database table sources store the source records shown in the search results.

How to change text on the page

To change the visible text on the Sources page, open page6_sources.html.

Examples of text that can be changed include:

- the browser tab title:

```
<title>Sources Database</title>
```

- the main page heading:

```
<h1>Sources Database</h1>
```

- the search section heading:

```
<h2>Sources Database Search</h2>
```

- the results heading:

```
<h2>Sources Search Results</h2>
```

- button text such as:

```
<button type="submit">Search</button>
```

and

```
<button type="button" onclick="printResults()">Print Results</button>
```

After editing the text, save the file and refresh the browser to check the changes.

How to change the search options

The dropdown search options are written in the form inside page6_sources.html.

For example, the source type options are written as:

```
<option value="Log Book">Log Book</option>
<option value="Admissions Register">Admissions Register</option>
<option value="Photograph">Photograph</option>
<option value="Map">Map</option>
```

If the client wants to add, remove, or rename an option, these <option> lines can be edited.

The same applies to other dropdowns such as:

- School Name
- Department
- Source Type

How to change the input fields

The Sources page currently includes these search fields:

- School Name
- Source Type
- Department
- Keyword

If one of these fields needs to be added, removed, or renamed, the changes must be made in two places.

1. In the HTML form

This controls what the user sees.

For example:

```
<label>Keyword</label>
```

```
<input type="text" id="Keyword" name="Keyword">
```

2. In the JavaScript search logic

This controls how the value is used in the database search.

For example:

```
const keyword = document.getElementById("Keyword").value.trim();
```

and

```
if (keyword !== "") {
  query = query.or(`Source.ilike.%${keyword}%,Notes.ilike.%${keyword}%`);
}
```

If a new field is added, both the form and the JavaScript logic must be updated.

How to change the database search logic

The Sources page connects to Supabase and searches the sources table.

This line begins the database search:

```
let query = client.from("sources").select("*");
```

The selected filters are then applied to the query.

Examples include:

```
query = query.eq("School", schoolName);
```

This means the selected school must match exactly.

```
query = query.eq("Source type", sourceType);
```

This means the selected source type must match exactly.

```
query = query.or(`Source.ilike.%${keyword}%,Notes.ilike.%${keyword}%`);
```

This means the keyword will search both the Source and Notes columns without being case-sensitive.

This part should be edited if:

- a database column name changes
- a new search filter is added
- the keyword search needs to include other columns
- the client wants the search behaviour to change

How to change the results shown on the page

The search results are created inside the JavaScript data.forEach(row => { ... }) section.

Each result currently shows:

- Source title
- Type
- School
- Department
- Notes
- Hyperlink

For example:

```
<span class="result-label">Department:</span> ${row["Department"] || ""}
```

and

```
${row["Hyperlink"] ? `<a href="${row["Hyperlink"]}" target="_blank">View Source</a>` : "No link available"}
```

If the client wants to change what appears in the results, this section can be edited.

This may include:

- removing fields
- adding extra fields from the database
- changing the order of fields
- changing the hyperlink text

How to change the styling and design

The appearance of the Sources page is controlled by this CSS file:

```
<link rel="stylesheet" href="css/style.css">
```

To change the design, open css/style.css.

This file can be used to update:

- colours
- fonts
- spacing
- button design
- search box layout
- result box style
- navigation and header appearance

How the print button works

The print button uses this JavaScript function:

```
function printResults() {
  window.print();
}
```

When clicked, it opens the browser print window so the results can be printed or saved.

If the client no longer wants this feature, the button or function can be removed.

Important maintenance notes

When making changes to the Sources page, the following should always be checked:

- the Supabase table name is still correct
- the database column names still match the code exactly
- any new field added to the form is also added to the JavaScript search logic
- hyperlinks still open correctly
- the page is tested after changes are made

If the form is changed without updating the JavaScript, the search may stop working properly.

Summary

The Sources page can be maintained by editing:

- page6_sources.html for page text, search fields, and JavaScript logic
- css/style.css for design and appearance
- the Supabase sources table for the stored data

This allows the page to be updated in future if the client wants to change the design, improve the search options, or add more source records.

Conclusion

This instruction manual provides a clear guide on how to use and maintain the Marshfield School History website. The system is designed to be user-friendly and flexible, allowing both users and developers to access and update historical information efficiently.

Future improvements could include adding more database features, improving search functionality, and expanding the available historical records.
